March 25, 2019

To Whom It May Concern,

The South Central Task Force (SCTF) is a regional preparedness organization comprised of representatives from public safety, non-governmental and private sector organizations from the counties of Adams, Cumberland, Dauphin, Franklin, Lancaster, Lebanon, Perry and York. The SCTF collaborates and coordinates resources for regional solutions to provide support to its constituent communities. The SCTF GIS Working Group (SCTF-GIS) supports this mission by combining local data into regional datasets that are the foundation for several map-based products and initiatives.

The advent of Next Generation 9-1-1 (NG9-1-1) puts GIS data at the center of the 9-1-1 call routing process. The initial step to achieving NG9-1-1 data standards is to evaluate and remediate existing datasets and assess the workflows being used to create the regional layers. Therefore, Dauphin County, on behalf of the SCTF, is soliciting quotations from qualified firms to provide GIS data evaluation tools and workflow assessments for the SCTF-GIS member counties.

The objective of this Request for Quotation (RFQ) is to provide sufficient information for qualified Respondents to competitively pursue reviewing this organization's data and workflow evaluations needs, configure a solution and submit written quotations to satisfy the stated and implied objectives.

Interested Vendors may request a copy of the Request for Quotation by contacting Megan Birch at [mbirch@dauphinc.org](mailto:mbirch@dauphinc.org). Email requests should specify SCTF-GIS RFQ in the subject line.

Sincerely,

Stephen B. Libhart
